

**Tired of New Programs Being
Developed Without Beside Nurse Input?**

Help Us Develop the Los Robles New Mother-Baby Couplet Program

For Registered Nurse Members at Los Robles Hospital & Medical Center

**Monday, December 21, 2009
3 p.m. to 8 p.m.
Drop in when you can
Classroom 1**

Los Robles will start a family-centered, mother-baby care program in January. Our Union is aware of the proposed change and this meeting is for members to give their input on staffing requirements based on Title 22 and state ratios, as well as cross-training and any other issues.

Rather than separating mothers and babies after birth, families will be cared for as a unit. Although this model is new to Los Robles, it is the standard model for delivery of effective, efficient patient care for mothers and babies in most hospitals across the country.
