

PATIENT CARE IS OUR BOTTOM LINE

Our bargaining team is working hard to secure a strong new contract.

From Day One, we have made it clear that patient care is our number one priority. That's why we have emphasized vital safe staffing changes so patients get the individual time and care needed, as well as proposed improvements to wages and benefits to retain and attract the best nurses in the field.

We continue to call on Southern California Hospital of Hollywood to put patients before profits and work with us on a strong new contract.

**Our next bargaining dates are
October 3 and 4.**

for our Bargaining Team by
Standing United
& WEARING PURPLE**

ARE YOU RECEIVING ALL THREE REST BREAKS?

Today, hospital management admitted to only giving RNs two rest breaks per shift. Under the law, hospitals must give us one uninterrupted rest break for every four hours of work, along with two 30-minute meal periods (unless one meal period is waived).

**Contact a Bargaining Team Member today if you are
only receiving two rest breaks or less.**
